#### **TEXAS, South Panhandle**

YOAKUM COUNTY --- 10.0 W DENVER CITY [32.97, -103.02], 12.0 E DENVER CITY [32.97, -102.64]

04/12/17 13:12 CST 0 Hail (1.75 in)

04/12/17 13:45 CST 0 Source: Emergency Manager

A swath of hail was reported from 10 miles west of Denver City to 12 miles east of Denver City. Multiple reports were received of hail up to golf ball size. No damage was reported.

A compact but strong and slow moving upper level trough brought widespread soaking rains to much of West Texas during the morning hours on the 12th through early on the 13th. On the afternoon of the 12th, an isolated severe storm developed in eastern New Mexico and moved into Yoakum County as it tracked eastward. This storm tracked across the southern portion of the County affecting Denver City.

PARMER COUNTY --- 1.5 SSW BOVINA [34.50, -102.91], 1.0 ENE BOVINA [34.53, -102.88]

04/14/17 15:14 CST 0 Hail (1.85 in)

04/14/17 15:26 CST 0 Source: Storm Chaser

A storm chaser measured hail slightly larger than golf ball size along US Highway 60 southwest and northeast of Bovina. No damage was reported.

PARMER COUNTY --- 4.0 ENE BOVINA [34.54, -102.84], 8.0 S FRIONA [34.51, -102.73]

04/14/17 15:54 CST 3K Hail (2.75 in)

04/14/17 16:14 CST 0 Source: Storm Chaser

A storm chaser reported hail up to baseball size along US Highway 60 northeast of Bovina. Some storm chasers and a law enforcement vehicle received damage to their windshields.

PARMER COUNTY --- 7.3 E HUB [34.53, -102.62]

04/14/17 16:34 CST 0 Hail (2.80 in)

04/14/17 16:34 CST 0 Source: Storm Chaser

A storm chaser measured hail on the ground slightly larger than baseball size. No damage was reported.

PARMER COUNTY --- 7.1 NE LAZBUDDIE [34.46, -102.55], 7.9 NE LAZBUDDIE [34.47, -102.53]

04/14/17 16:59 CST 0 Tornado (EFU, L: 1.05 mi , W: 50 yd)

04/14/17 17:04 CST 0 Source: Trained Spotter

A tornado was initially spotted northeast of Lazbuddie near the Parmer/Castro County line at 1659 CST, before continuing east into west-central Castro County. No evidence of damage accompanied this tornado.

CASTRO COUNTY --- 9.8 NNW DODD [34.47, -102.53], 10.6 N DODD [34.48, -102.50]

04/14/17 17:04 CST 0 Tornado (EFU, L: 2.04 mi , W: 50 yd)

04/14/17 17:07 CST 0 Source: Trained Spotter

This is the continuation of the prior tornado in Parmer County. This tornado tracked east into west-central Castro County where it dissipated around 1707 CST, about 12 miles west-southwest of Dimmitt. No evidence of damage accompanied this tornado.

CASTRO COUNTY --- 9.2 W DIMMITT [34.53, -102.48], 8.8 W DIMMITT [34.53, -102.47]

04/14/17 17:19 CST 9K Tornado (EF0, L: 0.39 mi , W: 25 yd)

04/14/17 17:20 CST 0 Source: Storm Chaser

A storm chaser observed a brief tornado touchdown just south of the intersection of State Highway 86 and Farm to Market road 1524. Several power poles were downed along Farm to Market road 1524.

CASTRO COUNTY --- 6.1 WSW DIMMITT [34.50, -102.41], 3.9 SW DIMMITT [34.51, -102.37]

04/14/17 17:27 CST 30K Tornado (EF0, L: 1.95 mi , W: 50 yd)

04/14/17 17:36 CST 0 Source: Storm Chaser

Several storm chasers observed a tornado that began around the intersection of Farm to Market Road 1055 and County Road 618 and moved east for approximately two miles. Video evidence indicated this tornado moved over a feed lot and then into an open field. Several power lines were downed along Farm to Market Road 1055 and County Road 510.

A storm chaser reported golf ball size hail in Plainview. No damage was reported.

On the afternoon of the 14th, isolated thunderstorms developed along a dryline over far east-central New Mexico and moved into Parmer and Bailey Counties. Mixed layer CAPE reached values on the order of 3000 J/kg by late afternoon, with low level wind shear amplifying by early evening. One of these storms evolved into a slow moving supercell that persisted for almost nine hours and produced at least seven known tornadoes, including an exceptionally large EF-3 tornado near Dimmitt (Castro County) that damaged some homes and destroyed several structures. It is possible that satellite tornadoes accompanied the larger tornado at times, but no definitive evidence to this point was available. After remaining in Castro County for nearly four hours and producing flash flooding north and northwest of Dimmitt, the supercell storm finally accelerated southeast before dissipating over Motley County around 0100 CST on the 15th. A plethora of video evidence was available from numerous storm chasers observing this supercell.
